Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 December 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: _____.

DETAILED ACTION

1) Applicant's election without traverse of invention I, drawn on claims 1-9, in the reply filed on 12/20/2006 is acknowledged.

Claims 10-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Specification

2) Specification is not complete in that Pg. 3, last line and Pg. 4, first line have empty space placements for clay pigment composition data.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3) Claims 1-9, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 and claim 2 are not clear on "a shape factor". The term is not defined and the units are not clear. Also in claim 1, the "shape factor" is presented as a number and in claim 2 the "shape factor" is presented as a ratio.

Claim 1: the terms "calendarizing" and "calendarized" should be corrected to recite

- calendering - and - calendered -.

Claim 1 is not clear as to "a Helliotest value". It is not defined.

Claim 4: is "the weight of the coating" perhaps - the basis weight of the coating - since the weight is recited in "grams per square meter" units.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4) Claims 1-9, are rejected under 35 U.S.C. 103(a) as being unpatentable over Cummings (US 2003/0177952). Cummings discloses the process of making a coated paper that includes coating a sheet of paper with a composition and calendaring the paper to form a paper product of desired smoothness. The composition includes kaolin pigment that includes component A having particles of a shape factor of at least 45 and component B which particles have a shape factor of about 20, latex binder which reads on a polymeric binder, and water. Kaolin pigment particle size distribution of at least 80% is of equivalent spherical diameter less than 2 microns. Any differences between Coatings and the method of the present invention would have been obvious to one skilled in the art at the time the invention was made.

Conclusion

5) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.
